ETHAN W. ROBERTSON

757-741-5072 | erobertson753@outlook.com | https://www.linkedin.com/in/robertsonethan/ | https://ethan.science | Falls Church, VA

EDUCATION

William & Mary **Williamsburg, Virginia**

B.S. in Computational & Applied Mathematics and Statistics *May 2027*

- **GPA:** 3.9

Selected coursework: Honors Analysis, Mathematical Probability & Statistics, Cross-Sectional Econometrics, Bayesian Econometrics, Statistical Learning, Numerical Analysis, Mathematics of Financial Economics

RESEARCH

Do Transaction Fees Make Prices Less Informative? Evidence from Polymarket

Honors thesis (CAMS), advised by Rob Hicks *In progress*

- Estimates how trading costs affect price informativeness with a fee-dose design around Polymarket's March 2026 taker-fee change, using on-chain wallet-level trade data (BigQuery, DuckDB).

Entrant Type and Incumbent Network Upgrades: Cable Operators' DOCSIS 4.0 Deployment under Fiber and Fixed Wireless Entry

With Yong Paek, Ellie Price, Yongjoon Park, and Paroma Sanyal *TPRC 2026*

- Led the empirical analysis: event-study estimates of whether fiber and fixed-wireless entry raise DOCSIS 4.0 upgrade odds across 13,499 census tracts; drafted the data, methods, and results sections.

RELEVANT EXPERIENCE

Research Analyst Intern (Economics) **Washington, District of Columbia**

The Brattle Group *June – September 2026*

- Supported a case team on a live client matter; took point on the empirical work for a co-authored broadband paper presented at TPRC 2026 (see Research).

Research Assistant Intern **Washington, District of Columbia**

Council of Economic Advisers: Executive Office of the President *January – June 2026*

- Applied econometric and statistical modeling (elasticity estimation, partial-equilibrium welfare analysis, and synthetic control, among others) to large datasets in support of federal economic policy analysis.
- Built data pipelines and crosswalks in R and Excel to integrate large, heterogeneous datasets across incompatible classification systems at high granularity, with end-to-end validation and reconciliation of merged sources.
- Produced technical analyses and written deliverables synthesizing quantitative results for senior staff and principal-level audiences under rapid turnarounds.

Research Assistant **Williamsburg, Virginia**

AidData at William & Mary: China Development Finance Program *January – December 2025*

- Conducted structured data extraction and validation from financial documents, integrating West African government budgets and Chinese bilateral loan agreements into datasets.

Financial Analyst Intern **Strasbourg, France**

ACE Finance et Conseil *March – June 2024*

- Wrote a firm-commissioned, French-language internship thesis on Chinese land finance and property-sector risk; delivered bilingual equity reports, market briefings, and Excel models.

PROJECTS

Macro-Factor Sensitivity Analysis Project Report

- Developed and implemented Fama-MacBeth-style regressions on 316 U.S. financial firms (2001–2025) to quantify exposure to inflation, credit spreads, and GDP growth; produced resilience scores using R (tidyverse, zoo, plm).

LEADERSHIP AND SERVICE EXPERIENCE

Team Lead, Mason Investment Fund Quantitative Risk Group *August 2025 – Present*

- Lead a student-managed team building econometric risk workflows (scenario-response modeling, factor-exposure estimation, variance decomposition) and risk reports for fund decision-makers.

Presenter, William & Mary FED Challenge Team *May 2025 – Present*

- Researched and presented monetary policy analysis to Federal Reserve economists in inter-collegiate competition

SKILLS

- Technical: R (fixest, plm, data.table, tidyverse), Stata, Python (pandas, NumPy), SQL, Git, LaTeX, Excel
- French: fully fluent with certified full professional capacity (DELF B2)
